EH-600G

EH-600W

EH-10H

EH-400BW

EH-TPC

Stainless Steel Expansion Joint

Axial Movement: Compensating compression and extention of pipe movement, usually caused by temperature changing.

EH-150SG

EH-400SP

EH-400SG

EH-500HE

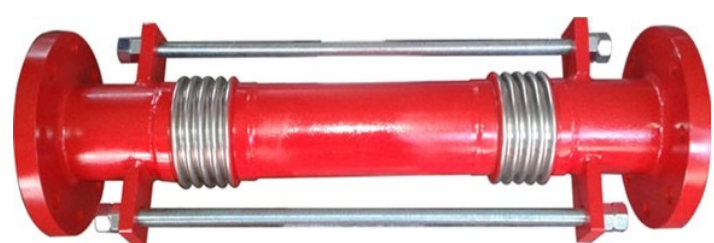

EH-1100H

EH-700H

Lateral Movement: Compensating the unequial settment

Stainless Steel Flexible Hose

EH-800H

EH-900H

EH-500T

EH-502

EH-504

EH-508

Stainless Steel Flexible Sprinkler Hose

Connecting the automatic sprinkler to the pipe, save time and reduce cost.

EH-8100-C (For Comercial Ceiling)

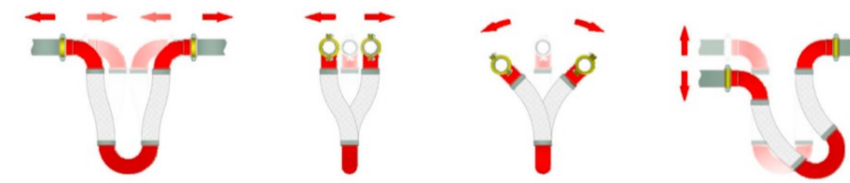

EH-8000 (For Clean Room)

EH-8100 (For Induct System)

U-Loop & V-Loop

Used to absorb the movements caused by the potential break downs and depressions especiall where the seismic movements may cause hazardous results

Spring Vibration Isolator
